2440 FULTON - The Project

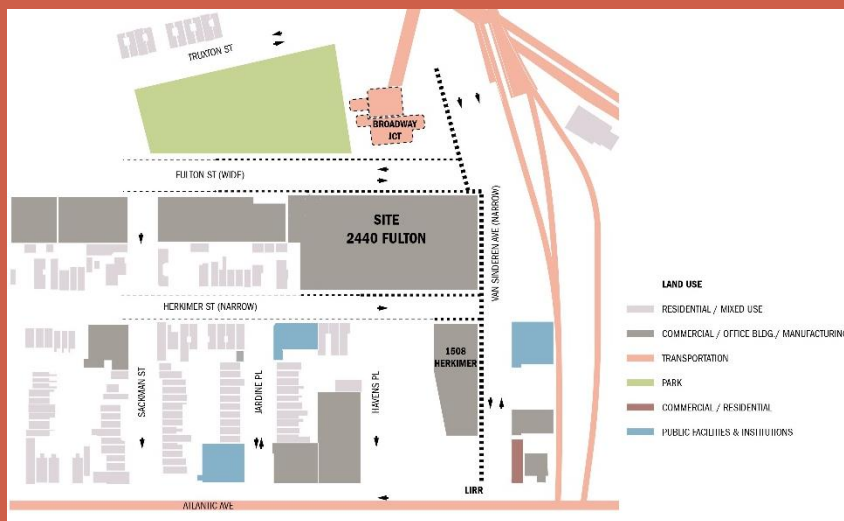

CIANCIOLO GROUP

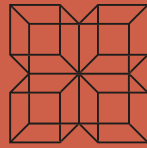

FACADES, CARPENTRY & WINDOWS

The new building at 2440 Fulton Street, developed by the Leser Group and designed by Marvel Architects, is largest Commercial Building in Broadway Junction Area of East New York. Will bring best-in-class commercial space that will host more than 1,100 employees from DSS' Human Resources Administration (HRA), along with private-market tenants. The new building will also offer about 80,000 square feet of private-market commercial space, including new retail space along Fulton Street, Herkimer Street, and Van Sinderen Avenue.

2440 FULTON - The Project

CIANCIÒLOGROUP

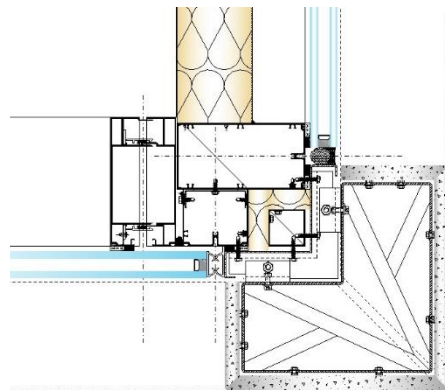

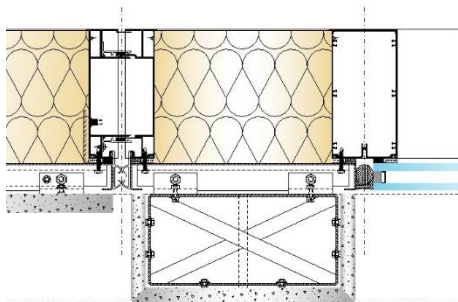

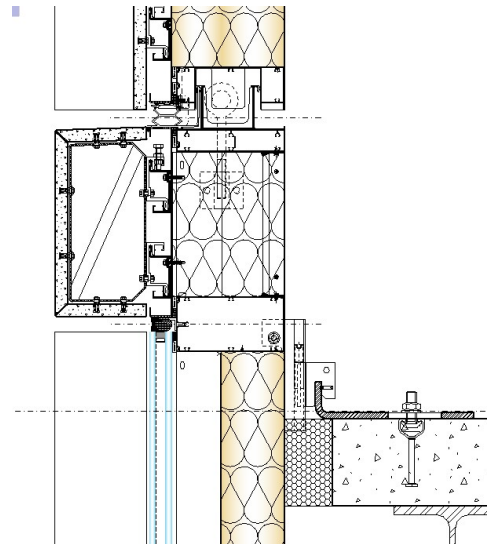

FACADES, CARPENTRY & WINDOWS

In compliance to project specification, Cianciòlo Group has designed and manufactured a building envelope consisting of IGU unitized system that features Argon cavities, low-e coating, solar coating, and warm edge spacer. The IGU glazing are structural silicone bonded on the aluminum frame.

The unitized panels are in combination with precast 3D in GFRC and ACM panels, for a total of nr 900 curtain walling units (65.000. sqft).

A further 32,000 sqft of ACM cladding and 21,500 sqft of storefront made with the aluminum Stick system were used.

The insertion of the canopies and entrance vestibules complete the work

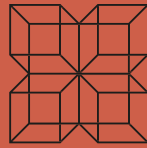

Since 1964 Cianciòlo Group

Our mission is to provide customers with added value to its structure with high competence and expertise gained in over 60 years of experience and success in the construction of building envelopes, with the realization of unique systems and complex.

The experience and quality that Cianciòlo Group offers is the product of personal commitment, dedication and excellence in the specialty with a deep knowledge sector and complementary methods necessary to achieve the objectives.

With this unique perspective, we give security to our customers that the construction and the installation will conform to what was designed.
